

# Tutorial - GitPatcher Troubleshooting

Friday, 22 March 2019 10:02 AM

Please ensure the Config page is pointing to the GitRepos.xml file.

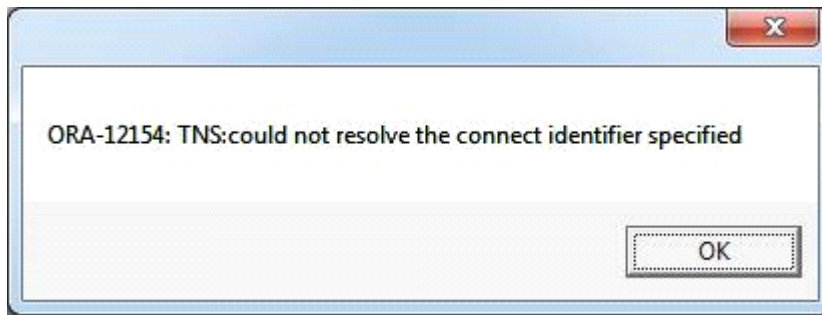

This happens on first time use.

Open and Close the main page.

This error occurs if the GitPatcher is pointed at a missing repo.

TNSNAMES.ora file needs a TNS entry.

This error is raised by LibGit2 library if the use signature is not set.
