

Git Patcher: Release Notes GP-0.17.0

Tuesday, 2 April 2019 9:39 AM

GP-0.17.0

Minimum Patch: SDEPLOY-30.01.APEXRM

Enhancements

Exception handling

- Exception handling for sequence confirmation.
- Exception handling for invalid feature tags
- Confirm and delete invalid tags

startGitPatcher

- Kill GitPatcher before pulling

PatchRunner

- "More Patches to be applied" msgbox
 - List App Codes with Patches
 - Enhanced message to fully explain the point of this list.

ARM Patch

- Recompile arm_installer specifically, as this is not recompiled by arm_invoker.compile_post_patch.

Workflow Changes

- Finish workflows if unhandled errors occur.
- Skip Post-Rebase Snapshot if no changes from rebase.
- Set step EXPORT-DATA - to unticked

Apex Export

- check which steps are necessary
 - Use GitBash to silently add files prior to calling commit dialog
- reimport app if required

Fixes

GIT Ops

- Fix to GIT ChangedFiles count

Minor Changes

- Added tooltips on Patch menu-items
- Display ChoiceDialog within the MDI
