Git Patcher: Release Notes GP-0.1.15

Tuesday, 2 April 2019   9:39 AM
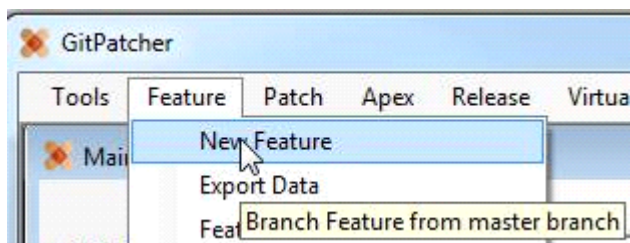

GP-0.1.15

Minimum Patch: SDEPLOY-30.01.APEXRM
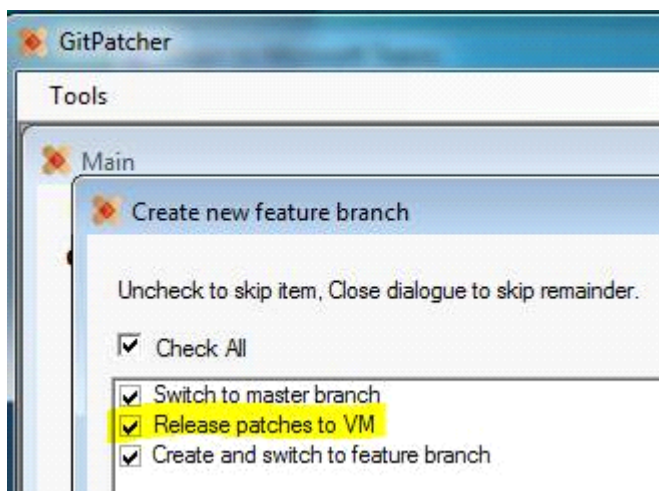

Enhancements

Workflow Changes

New Feature

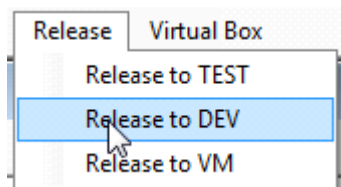

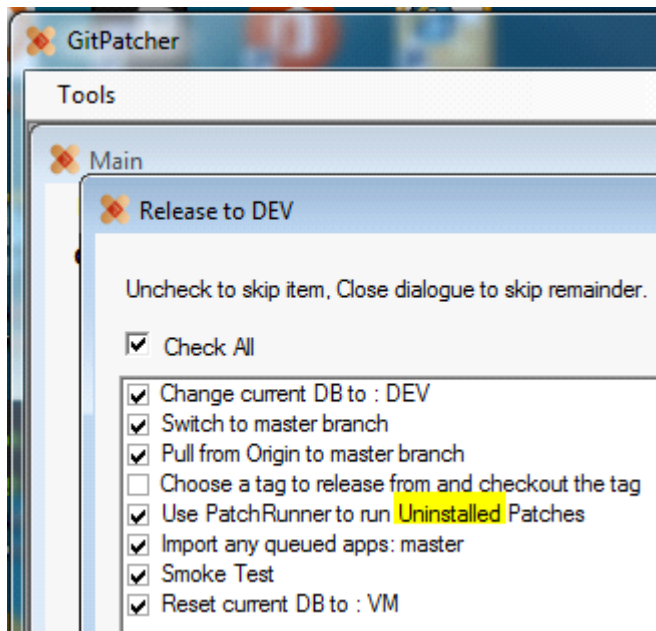

The workflow now includes a step to bring your VM up-to-date again before you start.

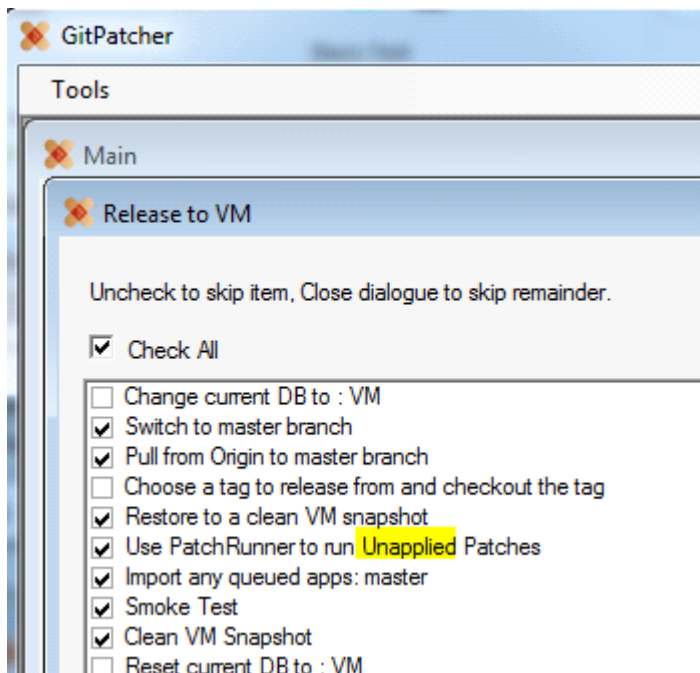

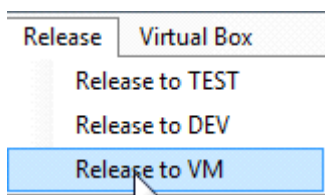

Release to DEV

Release Uninstalled Patches to DEV.

Release to VM

Release Unapplied Patches to VM (or any other env)

Minor Changes
- Virtual Box menu - if the path to Virtual Box is null then
  - display "Virtual Box path not set"
  - hide menu-items
- Data export script is now <project_root>\tools\db-spooler\script\exp_dat_<org>.sql Eg

- - D:\GitRepos\QHIDSe\tools\db-spooler\script\exp_dat_DCAS.sql
- Database selector only includes configured DB connections.

Fixes

- Fix to allow short-cut keys (Esp Ctrl-c, Ctrl-v, Ctrl-x) on the Configuration page.
